

Driver Checklist

Trailer Checklist Before Departure:

1. Check if wrenches and a jack are packed and know their location.
2. Check the tire pressure.
3. Ensure that the bolts are tight.
4. Check that the lights on the trailer are functioning.
5. Verify that the brakes are working.
6. Ensure that the Melges is securely fastened with straps.
 - Two straps over the boat and down into the trailer.
 - Two hand straps for the boom.
 - Two hand straps for the mast.
7. Connect the trailer, drive with it, and perform a sudden brake. Feel for any jerking or observe any signs that the trailer is braking on its own.
8. Check for any loose objects that could fall off or cause damage.
 - Both outside and inside the boat.
9. Carry at least two extra large straps in case any are damaged or lost.
10. Bring the vehicle registration document (located in a folder in NTNUI Seiling's mailbox at the NTNUI clubhouse).
11. Check that the car can tow a sufficient load.

Trailer Checklist Upon Arrival:

1. Check that it is not obstructing and is parked as agreed.
2. Ensure that the handbrake is engaged or there are wheel blocks in place.
 - Prevents it from rolling away.
